

Dojo Hero!

Detailed Instructions

- This game functions much like guitar hero or DDR-type games. As the targets fall down, the player must hit the correct keys (QWER (and UIOP in advanced+ mode)) as they hit the goals.
 - The closer the target is to the center of the goal, the higher the accuracy will be.
- There are two game modes and 4 difficulties per mode.
 - In Story Mode you have to reclaim your dojo after it has been taken over by an enemy clan. There are 9 levels in total, each progressively harder than the rest.
 - In Endless Mode the goal is to stay alive for as long as you can. The levels progress as in the Story mode, but there is no end besides death!
- Combos and Power-ups:
 - You unlock combos as you progress through the levels. If you are able to get a streak of 50 targets in a row without missing any you will do a special combo attack the next time you would land a successful hit.
 - Power-ups are received by successfully hitting the special targets. If all targets are successfully hit, the player will be granted a power-up for a period of time.
- Go save your Dojo!!!
